GRT Utilicorp, Inc. is proud to announce the introduction of the UTRTPD-10-15 track-mounted post driver. The machine is mounted on a heavy-duty rubber track assembly, making it one of the most versatile post drivers ever offered by GRT Utilicorp, Inc. The unit boasts a reliable and powerful Kubota diesel engine, a high-capacity oil system and powerful vibratory demolition-style hammer to drive posts in even the toughest conditions. Fore and aft movement, as well as boom leveling capabilities, GRT Utilicorp, Inc. also leaves the option open to add a pneumatic rock drill assembly or side mounted auger drill.

One of the most exciting features of the track-mounted post driver is its compact size. The machine is capable of driving a post that is 15 feet tall. Its compact size also allows the suitable option of transporting with a pick-up truck and equipment trailer. The compressed size and off-road capabilities of the UTRTPD-10-15 allows the machine to work in smaller areas, thus reducing lane closures in ideal conditions and also making it ideal for use installing solar panels in the push to become a more environmentally-minded society.

FEATURES:

- Large capacity hydraulic pump system
- Fore and aft movement of 24"
- Single lift cylinder design
- 180 degrees of turn table movement
- Vibratory demolition-style hammer drives posts in difficult soil conditions
- Kubota diesel engine standard
- Lightweight and compact designs leaves a small footprint
- Less on-road lane closures
- Optional post puller attachment
- Will handle a variety of posts up to and including 6x8 wood posts
- Will handle posts up to and including 15' tall
- Convenient pick-up truck and equipment trailer transport
- Heavy-duty rubber or steel track assembly
- Off-road capabilities ideal for solar industry
- Optional pneumatic rock drill attachment
- Optional drill attachment for auger or screw pile installation
